

ASHWITHAREDDYTHUMMALAPALLY

Cincinnati, Ohio | thummaad@mail.uc.edu | www.linkedin.com/in/ashwithareddy/ | 8653999754

SUMMARY

Graduate student in Computer Science with hands-on experience in SQL, Python, and Power BI. Skilled in data cleaning, analysis, and building clear, insight-driven dashboards. Familiar with relational databases and cloud analytics tools across Azure and GCP.

EDUCATION

Master of Engineering in Computer Science and Engineering

August 2024 - Present

University of Cincinnati

Bachelor of Technology in Computer Science and Engineering in AI&ML (CGPA: 8.31) **2020 – 2024**

MLR Institute of Technology

CERTIFICATIONS

- Certified for course completion in SQL by Simple learn in 2025.
- Certified for course completion of Data Science for Engineers by Swayam in 2023.
- Certified for course completion in Data Structure and Algorithms by Smart Interviews in 2023.
- Certified for participation in workshop based on working with Python on Artificial Intelligence and Data Science by Pantech E Learning in 2022.

WORK EXPERIENCE

Data Analyst Intern

Community Dreams Foundation

Dec 2025 – Present

- Assist in analyzing program and operational data to support planning and internal decision-making.
- Clean and prepare datasets by handling missing values, resolving inconsistencies, and standardizing formats using SQL, Python, and Excel.
- Support the development and maintenance of Power BI dashboards to track key metrics, trends, and program performance.
- Write and execute SQL queries to generate reports, perform comparisons, and respond to ad-hoc data requests.
- Create basic visualizations and summaries to communicate insights to non-technical stakeholders.
- Maintain documentation for datasets, reports, and dashboard logic to ensure clarity and repeatability.

Data Analytics Trainee / Academic Projects

Academic & Independent Projects

Aug 2022 – July 2024

- Worked on academic and self-initiated projects to gain hands-on experience with real-world data analysis scenarios.
- Collected, organized, and structured data from multiple sources into usable formats for analysis.
- Used Python (Pandas, NumPy) and Excel to perform data cleaning, exploratory analysis, and result summarization.
- Developed SQL queries to filter data, calculate summary statistics, and support comparative analysis.
- Created basic Power BI dashboards and visuals to present findings and key observations.
- Gained exposure to cloud databases by querying data in Azure SQL, MySQL, and Google BigQuery.
- Built a foundational understanding of analytics concepts such as relational databases, schema design, and simple data pipelines.

SKILLS

- **Data Analysis:** SQL, Exploratory Data Analysis (EDA), Data Cleaning, KPI Tracking
- **Visualization & Reporting:** Power BI, Dashboard Development, Basic Data Storytelling
- **Programming:** Python (Pandas, NumPy), Analytical Query Writing
- **Databases:** Azure SQL, MySQL, Google BigQuery (Basic)
- **Tools:** Microsoft Excel, SQL Server Management Studio (SSMS), Power BI Service

PROJECTS

Masters – University of Cincinnati

Retail Sales Data Pipeline & Analytics Dashboard

Aug 2025 – Dec 2025

- Built an end-to-end data pipeline to ingest, clean, and transform retail sales data for analysis.
- Designed a star-schema data warehouse and created automated ETL workflows for structured reporting.
- Developed an interactive Power BI dashboard to visualize revenue trends, product performance, and customer insights.
- Technologies used are Azure Data Factory, Azure Data Lake, SQL, PySpark, Power BI, Python.

Bachelors – MLR Institute of Technology

An Artificial Intelligence Enabled Machine for Human Behavior Detection

Jan 2024 – Mar 2024

- Developed an Artificial Robot that is useful to educate children and give awareness about good touch and bad touch.
- It complies with touch sensors and pressure sensors in which if threshold value is greater than the fixed value it is considered as bad touch.
- Technologies used are Face Recognition to load students' data.

Gesture-Based Operations

Aug 2023 – Nov 2023

- Created software to perform mouse operations with the help of hand gestures.
- Operations performed are zoom-in, zoom-out, volume-up and down, file open, etc.
- Technologies used are hand tracking modules to detect hand and OpenCV library for recognizing gestures.

ORGANIZATIONS

AIM Club – Internal Affair

Aug 2023 – Aug 2024

- I served as the Internal Affairs for the AIM (Association for Information Management) Club, where I was responsible for managing internal communication and coordinating between different team members.
